Discovery Request & Response

Our team with expertise of legal professionals offers accurate and quality E-discovery services. E-discovery is a process of identifying, securing and reviewing electronically stored information. This process often relates to criminal or civil legal disputes and is also useful for other legal diagnosis. Our team is highly experienced in handling documents and metadata like email, instant messaging chats, web sites and other electronically stored information. We evaluate every single information and prepare proper response. Our teams assist your company or law firm in responding to review with both Symantec E-discovery and relativity platforms. We support you by the best technical and project management staffs. We use the most powerful technology available to identify and review data. Our super quick responsive team makes sure to make a reply against every query.
