

Medical Record Summarization

Medical record summaries form the essence for determination of individual injury cases, Medical malpractice or medical injury, Insurance claim. It portrays the mishap, the instrument of damage and the quick care given at the scene and in the crisis room, in a compressed structure. Records of hospital stay, subsequent treatment by the physicians are summarized. Our team of experts reviews all the data carefully.

Our summaries are drafted and reviewed by experienced paralegals & paramedical resources. We carefully decrease records to facts; accurately record dates, figures, names and records. We give records of key occasions and findings, dispense with incidental data and sort out topics into lucid passages. Our medical records summarization has proved to be useful tool for early case assessment and quick review of medical documents at any stage of litigation. Our medical summarization process includes –

- ❖ Review of injuries
- ❖ Review of pre-existing medical conditions
- ❖ Progress notes, consultations, nurses' notes, diagnosis and treatment plan
- ❖ Discharge summary
- ❖ Summary of the medical treatment
- ❖ Distinguishing of lab results according to their significance level
- ❖ Making comprehensive chronologies or narrative summaries
- ❖ Developing timelines and charts to highlight treatment from relevant periods
